

Cohu Introduces RF Scrub Test Contactor

March 7, 2016

POWAY, Calif.--(BUSINESS WIRE)--Mar. 7, 2016-- Cohu, Inc. (NASDAQ:COHU) a leading supplier of semiconductor equipment announced today the introduction of RF Scrub contactor for testing a wide spectrum of devices with frequencies up to 33 GHz.

Secular growth of internet traffic is demanding faster wireless speeds that drive expansion of RF products, like near-field communications, filters, switches and power amplifiers. These semiconductors play a critical role in connectivity, especially in feature-rich smartphones designed to operate across multiple bands, like 2G, 3G and 4G LTE networks, as well as WiFi, Bluetooth and GPS, and the emerging IoT (Internet of Things).

The RF Scrub contactor has been in production for several months at five customers, validating the innovative long-life, elastomer-free solution for testing high frequency semiconductors at various temperatures used in consumer and automotive end-market applications. Cohu will be showcasing RF Scrub and other innovative test contactors at the Burn-in & Test Strategies (BiTS) Workshop on March 7-9 in Mesa, Arizona.

About Cohu:

Cohu is a leading supplier of semiconductor test and inspection handlers, micro-electro mechanical system (MEMS) test modules, test contactors and thermal sub-systems used by global semiconductor manufacturers and test subcontractors.

Forward Looking Statements:

Certain matters discussed in this release, including statements concerning Cohu's test contactor products and growth aspirations are forward-looking statements that are subject to risks and uncertainties that could cause actual results to differ materially from those projected or forecasted. Such risks and uncertainties include, but are not limited to, our ability to convert new products under development into production on a timely basis, support product development and meet customer delivery and acceptance requirements for next generation equipment, failure to obtain customer acceptance resulting in the inability to recognize revenue and accounts receivable collection problems, our reliance on patents and intellectual property, compliance with U.S. export regulations, and the cyclical and unpredictable nature of capital expenditures by semiconductor manufacturers. These and other risks and uncertainties are discussed more fully in Cohu's filings with the Securities and Exchange Commission, including the most recently filed Form 10-K and Form 10-Q. Cohu assumes no obligation to update the information in this release.
